

Virtual Services Available to Help You Export

Webinar Opportunity

Join us and the Rockford Area Economic Development Council for a look at how we continue to support new and experienced exporting companies in Rockford and the surrounding area.

Hear from our US Commercial Service experts on how the B2B Matchmaking, Market Research, and Due Diligence services are available to you during this time of decreased international business travel. These services can provide your company with new international sales opportunities, expanded market access, and peace of mind when dealing with foreign buyers.

In addition, representatives from the US Export-Import Bank and Small Business Administration will discuss export finance programs tailored specifically for international growth.
